Cristina Paulino is an  
Assistant Professor at  
the Groningen  
Biomolecular Sciences  
and Biotechnology  
Department of the  
University of  
Groningen, NL..

# 3rd NCCR TransCure Career Pathway Lecture by Cristina Paulino

Prof. Cristina Paulino will give this year's career pathway lecture.

As Assistant Professor for Cryo Electron Microscopy she is a highly promising young group leader in a rapidly growing scientific discipline.

In her lecture she will talk about her scientific development which has led to her current position as principal investigator.

She will address important questions on career decisions, compare academia and industry and describe what it takes to overcome obstacles.

Prof. Paulino's talk will be followed by a casual business lunch, offering the opportunity to discuss further with her and other attendees.
